Subject: RE: Please move *.conf files to snapshot

It did not.

In particular, https://19january2017snapshot.epa.gov/climatechange/science/index.html did not redirect
while https://www.epa.gov/climatechange/science/index.html does.

Are these *.conf rules being read?

~Mike

This is done, did it address the problem?

Thanks,
LeAnn Spradling | Director of Consulting – Service Delivery Manager

Hi.

Judy is uncovering broken links on snapshot.epa.gov that aren't covered by the redirects LeAnn just
added.

Like this page, https://snapshot.epa.gov/ghgreporting/forms/contact-us-about-ghg-reporting_.html -> all of
the bulleted URLs are broken, as is the EPA's Media Contacts link. That's because they're pointing to
various URLs, like /climatechange/, and redirects that are handled in the *.conf files on www.

E.g.,

https://snapshot.epa.gov/climatechange/science/index.html is 404
https://www.epa.gov/climatechange/science/index.html redirects to https://www.epa.gov/climate-change-
science because of the *.conf redirect.

https://snapshot.epa.gov/climatechange/policy/index.html is 404
https://www.epa.gov/climatechange/policy/index.html is also 404 ... So whatever.

https://snapshot.epa.gov/climatechange/ghgemissions/index.html is 404
https://www.epa.gov/climatechange/ghgemissions/index.html is also 404. Hmm.

https://snapshot.epa.gov/climatechange/effects/index.html is 404. So is
https://www.epa.gov/climatechange/effects/index.html

https://snapshot.epa.gov/climatechange/wycd/index.html is 404
https://www.epa.gov/climatechange/wycd/index.html redirects to https://www.epa.gov/climatechange/what-you-can-do-about-climate-change because of the *.conf redirect.

So Judy, we can take care of some of these broken snapshot links, but others are just plumb broken on www.

~Mike
